

In the frame of a Belgian National Fund for Scientific Research (FNRS) project between the Université libre de Bruxelles and the Université de Liège (Gembloux Agro-Bio-Tech), Belgium, one multi-disciplinary postdoctoral position is open.

We are looking for a researcher skilled in isotope geochemistry, willing to develop and apply isotopic tools to trace the origin and environment of animals. An expertise in transfer processes in the soil-plant system or metal bioaccessibility is a plus-value.

Candidates should have obtained a PhD degree in geosciences less than 5 years ago (increased by one year per birth and/or adoption). The ideal candidates will show scientific curiosity, ability to work in collaboration, interests in geochemistry, environment and geosciences, and ability to work in clean labs. The working language is English and/or French, and the candidate will be based mainly in Brussels but will share his/her time with the second partner (ULiège). All the lab preparations and analyses will be performed at ULB (Laboratoire G-Time hosts state-of-the-art clean labs and analytical facilities).

Salaries are competitive and allow comfortable living in Belgium. Appointment is for 1 year, renewable 1 time (2 years in total) depending on results and progress.

To apply, send your CV with a motivation letter (plus 2 potential referees) in English to the coordinator of the project Nadine Mattielli (nadine.mattielli@ulb.be). The position will start as soon as possible from April 1st 2022, and will remain opened until being filled.

Nadine Mattielli (Université libre de Bruxelles – Faculté des Sciences, DGES, Laboratoire G-Time)
Jérôme Bindelle (jerome.bindelle@uliege.be - Gembloux Agro-Bio Tech, Université de Liège)
