

**UNIVERSITY OF CALGARY**  
**DEPARTMENT OF GEOSCIENCE**

The Tutolo Reactive Transport Research Group at the University of Calgary is currently accepting applications for a **PhD student to work on a** project investigating sedimentary phosphate deposition and developing a depositional model for phosphate-hosted Rare Earth Element (REE) deposits.

The project will be funded for 4 years, mainly through the Research Affiliate Program of the Geological Survey of Canada and co-supervised by Dr. Steve Grasby.

Applications will be accepted until September 1, 2021, and students must start prior to the 2022 field season.

Any applications or requests for further information should be sent to:
