

## **Postdoctoral Researcher in Aqueous Geochemistry/Hydrothermal Systems**

The Department of Earth and Environmental Sciences at the University of Minnesota-Twin Cities seeks applicants for a post-doctoral position in aqueous geochemistry. The successful candidate will assist with development and application of new analytical instrumentation (ICP-MS) and participate in studies involving mineral-fluid interaction at a wide range of chemical and physical conditions, with implications for the chemical evolution of the ocean. The position requires a Ph.D. in geochemistry or related fields. Familiarity with laboratory research, computer modeling, and experience with mineral solubility studies is beneficial. This is a one-year appointment with the likely possibility of renewal based upon performance and ongoing operational needs. Please visit the research group website:

<https://www.esci.umn.edu/people/william-seyfried>

**For questions regarding the position please contact Dr. Seyfried ([wes@umn.edu](mailto:wes@umn.edu)).**

**Candidates must apply online at <http://humanresources.umn.edu/jobs>; Job Posting ID Number: 336619\*; and must submit CV/Resume and a Cover Letter.** Recommended but not required are Statement of Research Interests and Names of Three References.

*The University of Minnesota is committed to the policy that all persons shall have equal access to its programs, facilities, and employment without regard to race, color, religion, national origin, sex, age, marital status, disability, public assistance status, veteran status or sexual orientation.*
